DETAILED ACTION

Double Patenting

1. Claim 22 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 23. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Allowable Subject Matter

2. Claims 1-21, and 24-25 are allowed.

Applicant's independent claims 1, 7, and 13: The present invention is directed to a computer controlled method, the independent claim identifies the patentably distinct feature "receiving provisioning information from said provisioning device over said at least one preferred channel, wherein the provisioning information includes a credential and wherein the credential facilitates becoming a member of a secure credential infrastructure; and automatically configuring said wireless sensor for transmitting sensor information over a secure communication channel responsive to said provisioning information". Applicant's independent claims 1, 7, and 13 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
